DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group A:

A1: metal area formed by direct copper bonding or active soldering

A2: metal area formed by a thick film technology/process

A3: metal area formed using the Mo-Mn process, a W process, an LTCC process, or combinations thereof

Group B:

B1: heating effected by means of an energy beam or laser

B2: heating effected by means of a hot gas beam, a flame, a plasma, or microwave energy

Group C:

C1: ceramic layer separated during the thermal treatment

C2: ceramic layer separated (broken) after the thermal treatment

Group D:

D1: ceramic layer held in a clamping fixture

D2: ceramic layer held on an adhesive foil

Applicant is required, in reply to this action, to elect **one single species from each of groups A, B, C, and D,** to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

A1: claims 28 and 49

A2: claim 29

A3: claim 30

B1: claims 31 and 32

B2: claim 35

C1: claim 33

C2: claim 34

D1: claim 40

D2: claim 41

The following claim(s) are generic: 27, 36-39,42-48.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each of species A1-A2 is directed to a different method of providing a metal area. Each of species B1 and B2 is directed to a different method of heating. Species C1 is directed to breaking off the ceramic substrate into single substrates during thermal processing, whereas species C2 is directed to breaking off the substrate after the thermal processing. Species D1 and D2 are each directed to a different way of holding the ceramic substrate during the processing.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3729

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
